***** Notes of Significance *****
Fires highlighted in yellow have submitted a final ICS-209

[illegible]

Evening Brief

Date: Wednesday August 30, 2017

Weather Summary

***** Mixed Dry/Wet Lightning over Eastern areas of the Great Basin *****

***** High Risk for Gusty Winds 15-30 mph across Southern Idaho Thursday *****

***** Near Record Heat Returns to Most Areas this Weekend into Next Week *****

Lingering thunderstorms from overnight continuing Thursday over the eastern half of the region, but will be trending wetter and mainly occurring in areas where fuels will have moderated a bit. Best chances of mixed dry strikes will be across far western Utah into eastern Nevada, where drier air starts to push in.

The only critical area of the Great Basin today that will be southern Idaho, where gusty NW winds of 15-30 mph will develop this afternoon. These winds will impact ongoing fires and increase the likelihood for kicking up holdovers.

Strong high pressure will build across the Great Basin Friday through the holiday weekend, bringing a return of abnormally hot and dry conditions, with temperatures near record highs. Very low RH and poor overnight RH recovery should be expected along with Haines 6 in many areas, increasing chances for holdovers and plume dominated fire growth on existing fires, especially over the northern half of the Great Basin.

Preparedness Levels

Great Basin	3
National	5

Great Basin Fire Activity (from Irwin): Moderate Activity

New Fires and Acres: 39 fires for 38,371.5 acres; 7,283 acres large fire growth; 8 new large fires

Resources:

- Crews: 11 T1 IHCs in GB: 9 Committed, 2 Day Off.
 - GBCC has committed an estimated 76+ Type 3, 4, 6 engines.
 - 0-T1 and 3-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

With thunderstorms in the forecast for eastern areas Thursday, some slight moderation of fuels is possible in areas that get low end wetting rains or higher RH from any recent thunderstorms. However,

fuels in many areas will range from normal late summer dryness, to near record dry levels, with the driest fuels in the Central Idaho mountains.

Near record temperatures and very dry conditions return region-wide Friday through the holiday weekend with fuels drying out rapidly once again. Fuels across central and even southern areas of Utah and Nevada will dry rapidly over the next few days, approaching critical levels by the end of the weekend.

We continue to have a Great Basin Fuels and Fire Behavior Advisory in effect for Nevada, Idaho and Utah, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf
